**Abstract:**

...the cutting edge of product design include 3-D solid-modeling software, rapid-prototyping technology, virtual-reality-based design tools, and collaboration tools that utilize the power of the **Internet** and the **Web** to help companies design products better and faster. Advances being made as several companies, including Spatial Inc., Fakespace Systems Inc. and General Motors, are described and an interview presented with Fakespace Systems vice president of strategic relations, Jim Angelillo.

**Text:**

...ideas is the use of high-tech design tools that enable a small to mid-sized **company** to take an idea and create a high-quality product that will outperform those of...

...dimensions. Parts represented as solids have volume, and if given a density can have a weight and mass as well. The computer can calculate many physical properties of these parts, such...

...a solid model or a solid assembly of several parts an important component of a **company's** intellectual property. Complementary technologies such as product data management and engineering document

management make...

...companies to manage this data and keep it safe yet accessible to those within the company (via intranets) and outside the company (via the Internet) who need to be kept abreast of a product's status and...

...manner that resembles real life.

A General Motors Corp. Metal fabricating Div. engineer uses the company's 3-D VR program, VisualEyes, to check the design of GM's sheet-metal...

...of components, subsystems, and total vehicle.

Companies are using VR-based tools to analyze and test parts or complete assemblies of models that exist solely in the digital world, often referred...introduced to the market.

Marina Hatsopoulos, president of Z Corp., a Burlington, Mass.-based RP company that makes the 2402 concept modeler, says the Internet will make 3-D faxing a...Higgins, vice president of engineering for Matrix.

Engineering typically represents 30% of the cost of the job. Design time also is probably the biggest factor in making or missing a delivery schedule. In the past company engineers working in a 2-D design package called AutoCAD from Autodesk Inc., San Rafael...

...necessitated changing every drawing individually.

Matrix needed a better way to make design changes. The company evaluated several 3-D solid-modeling design software systems, ultimately choosing SolidWorks from SolidWorks Corp...

...in one week," notes Higgins. He says the savings in engineering resources has improved the company's project cost margins, giving Matrix more leeway in competitively pricing its services.

Moving to...

...The ability to collaborate on designs is becoming increasingly important. How can VR facilitate a company's ability to collaborate?

Angelillo: The collaboration part is important because companies have plants and...

...have people in various locations, those savings are enhanced.  
IW: What would it cost a company to implement such a system?

...a way that helps end users intuitively convert information into knowledge," reports Craig Peterson, the company's managing director of strategic development.[www. musetech. com](http://www.musetech.com)

The Monkey Wrench Conspiracy, an intergalactic...

...must work through a number of design exercises that illustrate various capabilities of thinkdesign, the company's design software.-[www.think3.com](http://www.think3.com)

e-Vis.com, an Internet portal for manufacturing companies...

**FAQs on Online research**

Bowers, Diane K  
Marketing Research: A Magazine of Management & Applications v10n4 pp: 45-48  
Winter 1998  
ISSN: 1040-8460 Journal Code: MRE  
Word Count: 3306  
Text:

...that may contain viruses.

Q: What about Qualitative research? Can Internet chat replace focus groups?

Online "chat" sessions, where one to dozens of pre-recruited respondents type in responses to a guided online discussion, can be used quite effectively to bring participants from virtually anywhere together to discuss...

...client issue, activities and experiences, or provide feedback on products. While the technology of IRC (Internet Relay Chat) and/or Web chat makes it easy to conduct discussions, it does not necessarily replace the benefits of traditional offline methodologies. Virtual groups do not allow for tactile touch/feel experiences or capturing facial expressions (consternation, excitement...

...often 20-30 pages of verbatim responses, available immediately. The primary advantages are speed of recruitment, elimination of travel costs and time required away from the office, respondent participation from

the comfort of their own home or office, and depth of information yielded.

While virtual focus groups will not always be able to replace in-person interviews, the benefits of speed and cost-savings of virtual focus groups make them a very effective tool for researchers-especially for gathering Web site feedback with participants "in the medium."

Q: How can I draw a sample of...

...for surveys can be recruited through a variety of methods, including customer/client lists, research company databases, targeted Web site promotions, on-site intercepts, online newsgroup posting areas, and even

off...a recent registrant at our Web site. . ."). Who is conducting

the  
research (e.g. "XYZ Company has been commissioned by [Client Name  
optional] to perform this research.")

What the research will...

...Web surveying, the data are submitted as smaller blocks  
(particularly  
when the database needs to **test** a set of answers for skipping  
instructions, randomization, or other logical functions). Because the  
Internet...leisure, online respondents actually tend to be very  
cooperative  
and honest. Certainly, establishing the research company's support  
for respondent confidentiality and honest research will help  
respondents  
feel more comfortable sharing...respondents, if the respondent has  
opted-in  
to do so, for richer analysis and sampling/weighting.

Although most new browsers allow users to either turn-off the ability  
to  
write a...

System Costs Slide

In the past, forming an online information **company** was a formidable, capital-intensive prospect, requiring investment in in-house computer and communication systems...

...computer systems for data storage and network management. At the other extreme is a "virtual **company**" alternative using an Internet-based approach: off-the-shelf software, with data storage and communications...

...storage and communications management. Such service could cost less than \$200/month. Even if a **company** purchases its own computer and telecom equipment, those fixed costs represent the bulk of its...

...Web environment need very little training. They're ready to go. That's worth its **weight** in gold."

Companies offering Web-based services with a ubiquitous browser interface can reap cost...of menus, commands, and indexes. They discourage easily, especially since searching is not their primary job responsibility. The more difficult or unreliable the search, the less likely it is an end...question is whether they see an economic advantage in moving quickly, and whether a startup **company** can off-set its resource disadvantages by being more nimble than industry behemoths.

The Internet...101-999 employees) have no Internet connection and no plans to acquire one. This sized **company** often goes unserved by the large and expensive traditional online providers and represents an

important...

...more likely use traditional online distributors or in-house data resources, perhaps via an Intranet.

**Company** management, quite rightly, asks why they and their employees need to be online. In the...to one based on how many thousand views you get from electronic ad placement."

The **test**, then, is for publishers to draw new customers to their online sites, or bring in...Internet is the proliferation of corporate Intranets, a World Wide-Web-like service exclusive to **company** employees. According to Forrester Research, 22 percent of the thousand largest companies in the United...

...information on corporate networks and to navigating around data resources with GUI-interfaced Web browsers.

**Company** expectations for features and functions will be driven by local Intranet experience. External information services...follow a focus strategy, serving vertical markets.

...been a consultant to Bill Gates at Microsoft in its infancy, helping to get the **company** its first million dollars in venture capital. He had advised Steve Jobs at Apple Computer...

...himself.

Trip Hawkins, a former top executive at Apple and founder of the software entertainment **company** Electronic Arts, says of Newman, "He was the first one to have the vision that...

...1975 at the age of 28 with, according to the San Francisco Examiner, the highest **test** scores of anyone ever admitted. He had already been a successful entrepreneur, having started San...

...of rolling paper called Acapulco Gold. The paper was made from hemp; profits from the **company** went to back an initiative petition on the California ballot to legalize marijuana. Eventually, the...

...an Altair-the same brand of computer that launched Harvard dropout Bill

Gates on his **career** after he cowrote a version of BASIC for it.

At Harvard, Newman was a "number...

...time position as an executive consultant at the Summa Corporation, Hughes's Las Vegas holding **company**, after graduation. By this time Hughes had died, leaving his empire in a shambles and...

...Newman left Summa in 1977 after Hughes's "missing will" surfaced and

control of the **company** passed on to Hughes's heirs. In 1978, he resurfaced in the Bay area as director of strategic planning for Shugart

Associates/ Xerox, the ground-breaking disk-drive **company**. Years later, Newman would claim to be the father of the 5 1/4-inch...

...Matsushita couldn't deliver. And by the end of 1978, Newman was out

of a  
job.

But during his time at Shugart, Newman had hooked up with the people who almost...

...at Apple was visionary. He proposed that Apple develop a portable computer years before the company actually built one. And more than a year before the first spreadsheet, VisiCalc, debuted and...

...According to Ed Niehaus, a friend and a public relations representative for Newman's last company, Metaview, Newman had circulated to venture capitalists a private plan for building portable Apples. When...

...He couldn't hold it together and the effort staggered." When Apple learned of the company, Peddle was fired, and Hawkins quit Newman's venture in order to stay at Apple...

...Hypermedia Group, recalls that, back then, Microsoft wasn't a giant, it was just a company that had written a BASIC program." Edlin continues, "I had some theories about the future..."

...to generate two to three ideas a minute."

In 1979, Newman had founded Microtype, a company that was going to produce low-end, low-cost, computerized typewriters. According to Edlin, Newman...

...2 each. Mating the keyboard with breakthrough daisy wheel-like printing technology would allow the company to package a \$300 microchip-driven typewriter. With added peripherals, it could be turned into a true computer.

Newman persuaded Gates and other friends of Edlin to invest in the company. At least a quarter of a million dollars was raised. A Stanford MBA was hired...

...Hawkins was placed in charge of market development. Gates was on the board of the company, as were Steve Ballmer of Microsoft (now senior vice president of systems software), 3Com's...profit potential. Matsushita paid Newman 30,000 a month not to negotiate with any other company for the rights to the technology, even though the technology existed mainly in Newman's...

...says Metcalfe.

But the pattern that Newman established with his previous venture re-emerged: The **company** fell apart. Money was flowing out far faster than it was flowing in, nor was...

...going crazy. He said lots of strange, conspiratorial things. He accused the president of the **company** of all kinds of nefarious acts. I believe he even got a warrant to arrest the president, who was off on a vacation sailing somewhere at the time."

The **company** came undone when Ballmer called Metcalfe and insisted that the two of them resign from...

...promotional headquarters for the Home Bus. Remember, this was also before Microsoft was a big **company**, and so Bill Gates and I slept on the floor of the suite. Although as...

...that volcano. He would explode with ideas every 15 minutes in spectacular fashion. The best **job** he could have had would have been if someone said, Sit behind a desk all...

...CP/Mbased computers. Newman had made contact at Kaypro years before when he sent the **company** his proposal for a portable Apple. On the strength of that proposal, and because of...

...and meetings were sometimes held with the participants sitting on surfboards, waiting for the waves. Job titles were frowned upon. Kay turned to his family to run the business, with sons...

...taking top positions.

Sandra Kutick, Newman's girlfriend through the years, began working for the **company** at the same time. She says that Newman was hired to be an experienced, conservative...there because "they shot down every good idea he came up with." Newman encouraged the **company** to begin making IBM compatibles; Kaypro balked. Also, says Dortch, Newman worked out a deal for the Japanese **company** Mitsui to manufacture a laptop with a desktop docking station and flip-up screen for...

...Kays making all the decisions themselves ... There was no organization chart, no department heads, no **job** titles, really. Although it was a public **company**, it was very much run as a private holding by the Kays."

Adding to the...

...tell stockholders at a New York meeting; later, when Newman

demanded  
that he run the **company's** annual meeting, the Kays refused. Also,  
Kay claims, "at the New York stockholders' meeting...

...looked at the future. I didn't really see Blair actively pursuing  
another full-time job after that," Kutick says. "That avenue seemed  
closed to him forever."

For several months, Newman...

...thing I worked on with him."

In 1986, Newman tried again to start his own **company**. Called  
the Metaview ...Show in Las Vegas, he again tapped his Hughes  
connection,  
drumming up attention for his **company** by holding product  
demonstrations in Hughes's old bunker, deep beneath the Nevada desert.  
As

...

...intensity. He saw it as a networking of the brain." In essence,  
Newman  
ran his **company** online, recruiting help and brainstorming for new  
ideas. Before getting onto The Well, Newman was...Not long after his  
death,  
The New York- Times published an article about Newman's **virtual**  
suicide" and **online** wake. (In death, as in life, Newman displayed an  
uncanny ability to attract publicity and...

...to The Well had somehow led to his suicide, an assertion disclaimed  
by  
virtually everyone interviewed for this article. Many believe that  
by providing a means of contact with the world...

...February 10

A news report tonight attributes the 13-pound increase in the  
overage  
**weight** of California teenagers to computer games and fast food.

Could be a natural combo franchise...
